Re: WLVA(AM), Lynchburg, Virginia

Facility Identification Number: 39579 Truth Broadcasting Corporation Special Temporary Authority

Dear Counsel:

This is in reference to the request filed September 17, 2007, on behalf of Truth Broadcasting Corporation ("TBC"). TBC requests further extension of the special temporary authority ("STA") granted on November 15, 2005, to operate Station WLVA from a site other than the licensed site. In support of the request, TBC states that it has found a new site for the station, that field strength measurements have been completed and that its consulting engineers have advised that an application for construction permit can be prepared for filing in the near future.

Requests for extension of STA will be granted only where the licensee can show that one or more of the following criteria have been met:

- Restoration of licensed facilities is complete and testing is underway;
- Substantial progress has been made during the most recent STA period toward restoration of licensed operation; or
- No progress has been made during the most recent STA period for reasons clearly beyond
 the licensee's control, and the licensee has taken all possible steps to expeditiously resolve
 the problem.

Our review indicates that Application BP-20071119AKG remains pending; thus, the licensee has been prevented from restoring licensed operation due to causes beyond its control and has taken all possible steps to expeditiously resolve the problem. Thus, extension of STA is warranted.

¹ WLVA is licensed for operation on 590 kHz with 5 kW daytime and 1 kW nighttime, employing different directional antenna patterns daytime and nighttime (DA-2-U). Application BP-20071119AKG proposes a change in frequency to 580 kHz, relocation of the transmitter and operation with 0.25 kW daytime and 0.015 kW nighttime, employing a nondirectional antenna (ND-2-U).

Accordingly, the request for extension of STA IS HEREBY GRANTED. Station WLVA may continue to operate with the following facilities:

Coordinates:

37° 19' 06" NL. 79° 16' 37" WL (NAD 1927)

Frequency:
Operating hours:

590 kHz Unlimited

Operating power:

Not to exceed 1.25 kW daytime and 0.25 kW nighttime

Antenna:

long wire

It will be necessary to further reduce power or cease operation if complaints of interference are received. TBC must use whatever means are necessary to protect workers and the public from exposure to radio frequency radiation in excess of the Commission's exposure guidelines. *See* 47 CFR § 1.1310.

This authority expires on September 28, 2008.

Sincerely,

Charles N. Miller, Engineer

Audio Division Media Bureau
